Aquatic Plants vs. Weeds **The good and the bad**

What is a POD?

As described by the ILMA president, a **POD** or Point Of Discussion is a “social gathering of intelligent minds discussing current and ongoing lake and watershed concerns”.

POD format:

- 15-20 minute topic presentation
- 5-10 minute Q&A session regarding presentation
- 10-20 minute debriefing to those present detailing pertinent ILMA/Lake news
- 10-15 minute open discussion
- Ongoing social discussion – Open floor

Typical POD session time will range between 70-90 minutes; however you are welcome to come as early and stay as late as the establishment will let you.

Join us to listen to our featured speaker - Mark Pfister, Director of Population Health Services at Lake County Health Department and Community Health Center, talk about Aquatic Plants vs. Weeds - the good and the bad and why aquatic vegetation is necessary in our lakes.

ILMA Board Members Attending

- Leonard Dane - President
- Brian Valleskey
- Mike Adam
- Carol Shobrook
- Sandy Kubillus

DATE: 4/28/2011
TIME: 7:00 PM
